

# Update on the Management of Gastric Intestinal Metaplasia and Gastric Neuroendocrine Tumor

## Program Description

The MGA Endoscopic Education Program Committee has been formed with the mission of providing practical, evidence-based lectures and seminars to practicing gastroenterologists and GI fellows in New England who may not have the opportunity to attend more distant and extended national conferences. This lecture series covers a broad range of topics in endoscopy, hepatology, and gastroenterology.

This eighth annual post-graduate course will provide an evidence-based update on the diagnosis, management and surveillance of gastric neuroendocrine tumor (NET) and gastric intestinal metaplasia.

## Program Objectives

As a result of participating in this program, learners should be able to:

- Utilize evidence based techniques in the management of gastric neuroendocrine tumor (NET)
- Apply the most recent guidelines regarding management of gastric intestinal metaplasia (IM)
- Recognize which patients require ongoing surveillance of gastric IM

Massachusetts Gastroenterology Association (MGA) in joint providership with the Massachusetts Medical Society presents:
